## Unable to start realtime sessions for Australian time zones

LegalCraft · Tuesday, December 27th, 2011

This is an issue with MS SQL Server time zone set to ISO 8601 format. To resolve this issue, please follow these steps:

Close Courtroom Server (if it is already running)

Go to Courtroom Server's installation folder (default: "C:\Program Files\LegalCraft\Riverlex Courtroom Server" or "C:\Program Files (x86)\LegalCraft\Riverlex Courtroom Server" for Windows 64-bit)

Locate and edit the file server.properties

Paste the following line at the end of the server.properties file:

```
server.ISO8601Time=true
```

Run Courtroom Server and create realtime session and start the session. It should start without any problem.
