MariaDB throwing exception

KVRN Kiran · Wednesday, December 24th, 2014

When Enterprise Server is connected to MariaDB, you may find exceptions in Enterprise Server log files saying “Too many connections”.

Follow these steps to fix the issue:

- * Open MariaDB home directory,
C:/Program Files/MariaDB 5.5
(or)
C:/Program Files (x86)/MariaDB 5.5
- * Open “data” directory
- * Edit “my.ini” file
- * In my.ini file under [mysqld] add
max_connections=1000
max_user_connections=200

Restart MariaDB.
